*7000 Years of Technology ...*

Recent archeological studies have uncovered records from Ancient Egyptian civilizations dating as far back as 5000 B.C. Cleansing the colon was a widely utilized method of healing for a wide variety of ailments and disease. Throughout the millennia, the practice spread across the continents and was incorporated by the fathers of modern medicine, Hippocrates, Da Vinci and Galen in the treatment of their patients. The methods have changed, but the benefits have not. In this toxic world, now more than ever, cleansing the colon is necessary for good health.
